

**MicroApplications, Inc.**

## **Is your network secure?**

- **93% of companies that lost their data center for 10 days or more due to a disaster filed for bankruptcy within one year of the disaster.** 50% of businesses that found themselves without data management for this same time period filed for bankruptcy immediately. *(Source: National Archives & Records Administration in Washington.)*
- Losses from computer crime are expected to soar 25% to \$2.8 billion in the USA this year, says market researcher TruSecure.
- File corruption and data loss are becoming much more common, although loss of productivity continues to be the major cost associated with a virus disaster. *(Source: 7th Annual ICISA Lab's Virus Prevalence Survey, March 2002.)*
- The Code Red worm in 2001 caused an estimated \$2 billion in damages and cleanup costs.

## **Call today for your FREE IT Security Assessment**

- Network attacks are changing everyday
- Hackers are constantly looking for new vulnerabilities
- 400 new viruses are discovered every month
- Viruses are getting more sophisticated deploying "blended" attacks to circumvent security measures

**Anti-virus alone is not enough to protect your data systems, comprehensive network security strategies need to be developed and deployed to keep ahead of these new threats.**
